EISAI FOUNDATION AWARDS GRANT TO CORNUCOPIA CANCER SUPPORT CENTER

Eisai USA Foundation awarded Cornucopia Cancer Support Center a grant for \$7,500 to help fund its Programs Coordinator position.

The Programs Coordinator interacts daily with Cornucopia's growing base of participants who seek non-clinical, palliative care on their cancer journey. The demand for programs and services that address quality of life issues continues to grow as the impact of cancer increases. Recent statistics from the American Cancer Society reveal that 52,000 North Carolinians are expected to be diagnosed with cancer this year.

Cornucopia's services address the needs of mind, body and spirit for those journeying with cancer, whether they are in treatment, a survivor, family member or caregiver. Programs include compassionate touch, movement classes, support, information and resources, all in a non-clinical setting.

The Foundation serves as the charitable arm of Eisai Inc., the U.S. pharmaceutical operation of Tokyo-based Eisai Co. Ltd. Eisai has a global commercial manufacturing and drug development site in Research Triangle Park. The company's commercial areas of focus include neurology, gastrointestinal disorders and oncology/critical care.

Information about Cornucopia's programs and services is available online at www.cancersupport4u.org or by calling 919/401-9333.
