Registration is Required

Please RSVP at 919-401-9333

Understanding the Oral Complications of Cancer Treatments is a presentation given to patients living with any type of cancer and their caregivers to advance the understanding of oral complications resulting from cancer treatment therapies, promote preventive measures to prevent dental disease, and improve the overall oral health quality of life before, during, and after cancer treatment therapy.

Discussion Topics:

- 1. Care of mouth prior to, during, and after chemotherapy and radiation therapy.***
- 2. Oral side effects of chemotherapy and radiation therapy.***
- 3. How to combat the side effects.***
- 4. Oral homecare practices to minimize the oral side effects of cancer treatment therapies.***
